DETAILED ACTION

Claim Objections

Claims 2-3 and 11 are objected to because of the following informalities: the recitations of “the space”, “the central space” and “the major portion” and “the minor portion” should be amended to –a space–, etc since these limitations have not been positively recited. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3-7,9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Benson et al (USPN 5,107,649). Benson discloses an inner wall, an outer wall and first and second tier spacers. See figure 9. The inner and outer walls have sealing surfaces, see #18. Vacuum channels are formed between the sealing surfaces and the edge of the spacers. Irrigation and aspiration tubes are shown in figure 21. Figure 15 shows perforated spacers. Figures 19 and 20 show the walls in a circular plan.

Claims 1-2,7 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Weisinger (USPN 3,862,489). Weisinger discloses inner (14) and outer walls (12) with first and second tier spacers (18). The walls have upper and lower sealing surfaces (20,22) which form upper and lower vacuum channels between the sealing surfaces and the edges of the spacers. The body also includes a vacuum tube (30).

Art Unit: 3763

Allowable Subject Matter

Claims 8 and 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
